

ENESEAL CR Now Available In 'Safety Yellow'

In response to high customer demand, ENECON has developed ENESEAL CR in *safety yellow* as an additional stock color.

ENESEAL CR is a UV and corrosion resistant, flexible coating system which dries to a highly durable, seamless, weather resistant, protective 'skin'. It is surface tolerant so grit blasting is not required and it bonds to all types of metal surfaces - including galvanizing. It also bonds well to concrete, stone, brick, slate, wood, tile, etc.
